ramkotni@gmail.com | 603.858.7546

EDUCATION

MASTER'S IN COMPUTER APPLICATIONS 2001
MK University

BACHELOR'S IN SCIENCE - MATHEMATICS
Andhra University

SKILLS

ARCHITECTURE

Microservices
Event-Driven Architecture
Distributed Systems
API Design
DDD

AI & GENAI

LangGraph
LangChain
RAG
OpenAI APIs
Prompt Engineering
Scikit-Learn

AGENTIC AI

BACKEND

Java 8-17
Spring Boot
Hibernate / JPA
Python (Flask / FastAPI)
REST APIs

CLOUD / DEVOPS

AWS
GCP
Kubernetes
Docker
Jenkins
GitHub Actions
Ansible

DATA

Oracle
PostgreSQL
MongoDB
Kafka
Redis

EXPERIENCE

ERCOT | SENIOR AI ENGINEER

Apr 2025 – Present | Taylor, TX

- Built an AI-powered feasibility screening platform using Machine Learning and Flask APIs, achieving ROC-AUC > 0.85 and automating resource onboarding decisions.
- Developed a Python-based payment monitoring solution using APScheduler and Pandas that automatically detects payment failures and generates actionable operational reports.
- Modernized grid reliability applications using Java, Spring Boot, Angular, REST APIs, and Ansible-based deployments.
- Integrated AI-driven workflows into existing enterprise systems, reducing manual analysis and improving operational efficiency.

AMAZON ROBOTICS | SENIOR FULL STACK DEVELOPER

Feb 2023 – Mar 2025 | North Reading, MA

- Architected cloud-native microservices and Angular applications supporting robotics manufacturing and warehouse operations.
- Implemented Kafka-based event-driven architecture and deployed solutions on AWS and GCP.
- Improved scalability, reliability, and deployment speed through Kubernetes, CI/CD, and cloud automation.

BIOGEN | LEAD FULL STACK DEVELOPER

Jun 2022 – Jan 2023 | Durham, NC

- Delivered secure supply-chain management solutions using Spring Boot, Angular, AWS, and cloud-native architectures.
- Implemented compliance-focused systems supporting HIPAA, GDPR, and FDA regulations

DELL TECHNOLOGIES | APPLICATION ARCHITECT / DEV LEAD

Jul 2015 – May 2022 | Austin, TX

- Led large-scale migration of monolithic applications to cloud-native microservices.
- Designed enterprise architectures leveraging Spring Boot, Kubernetes, Angular, PostgreSQL, MongoDB, and CI/CD pipelines.
- Mentored development teams and drove cloud transformation initiatives.

EARLIER EXPERIENCE | IBM, INNOMINDS, AND WELLS FARGO

- Delivered enterprise-scale solutions in eCommerce, financial services, PLM systems, and workflow automation using Java technologies, SOA, Spring, and web services.

KEY ACHIEVEMENTS

- Developed an AI-based feasibility prediction system replacing manual pre-screening processes.
- Automated payment failure detection and reporting using Python and Machine Learning technologies.
- Delivered enterprise cloud migrations and microservices transformations across multiple Fortune 500 organizations.
- Achieved 99.9% application availability through cloud-native architectures and DevOps automation.
- Reduced deployment times by up to 60% through CI/CD implementation and infrastructure automation.
